Analyze Different Types of Servers Using Webalizer.

Aim:

To analyze the performance and Usage statistics of different types of web servers using webalizer.

objective:

* To understand web server log files
* To configure webalizer for server log analysis
* To analyze the number of visitors, request.
* To compare the usage statistics of different Web Servers such as Apache.

Procedure:

1) Install webalizer

/var/log/apache/access.log

For Nginx:

1) http://localhost/webalizer/
2) Repeat some procedure for log files of different servers.
3) Run webaliz"

Step 4: View the Report

The generated report can be opened in a web browser.

The report contains graphical and tabular information

Result:

Thus the Webalizer tool was successfully used to analyze web servers logs files.
